Gobbling Turkey Action Model
By Joel Stern
Based on Taichiro Hasegawa’s “Barking Dog”

1. Start with the white side up. Fold the lower left corner to the upper right.
2. Fold the top edge to the folded edge on the near layer. Repeat behind.
3. Unfold the near layer.
4. Fold the bottom point up as far as possible without tearing the paper.
6. Inside reverse-fold the bottom point along the crease you made in step 4.
7. Close the near layer along the existing crease.
8. Valley-fold the left and right flaps in preparation for outside reverse-folds. There are no landmarks for these creases.

10. Outside reverse-fold the left and right flaps.

11. Rotate the model clockwise a little.

12. Pull out the trapped paper under the head, front and back. Mountain-fold the corners inward.

13. Inside reverse-fold the beak. There is no landmark for this.

14. Round the bottom of the head with a mountain fold. Repeat behind.

15. Mountain-fold the bottom flap. Repeat behind.

The Gobbling Turkey is complete.

Hold the model at the indicated circles and pull the tail; the head will bob up and down.
